

modern home building

DEPENDABLE MODERN BUILDING MATERIALS

THESE HOUSES LOOK ALIKE *but*

“A” IS OLD FASHIONED
“B” IS MODERN

 ALTHOUGH houses “A” and “B” look as much alike as peas in a pod, there is a vast difference in them . . . a difference in first cost; in comfort; in upkeep; in investment value.

“A” is a good house by old-fashioned standards. It was built of the best materials known before the development of such products as The Philip Carey Company has perfected in its scientific research laboratory.

“B” is the modern house—built at low cost to give modern comfort and freedom from maintenance worry and expense. It is easy to heat; free from drafts; requires the minimum of fuel; has a roof and siding that will last as long as the building and never require painting.

“A Home of Our Own”—this is the worthy ambition of the vast majority of American families. A good home is the

most satisfactory material possession one may acquire. It is a daily source of happiness and contentment; gives the owner a feeling of stability and permanence, as well as a standing in the community.

A good home, properly built of modern materials and bought at a price in keeping with the family income, is the soundest of all investments. Money invested monthly or weekly in a home is the one form of saving that can be most easily adhered to and in which enjoyment may be found in the sacrifices made. Untold thousands of families have made their start to financial independence through home ownership.

To buy or build a home that will meet your expectations and prove a good investment in the end, requires careful consideration of several fundamentals: (1) Inside plan that will suit the needs and contribute to the comfort and convenience of the

family; (2) Outside design that will present an attractive appearance and enhance value; (3) Sound construction by a reliable builder; (4) Long-life modern materials that will protect your investment through permanence and low maintenance costs.

To make sure of these basic essentials in your new home, it will pay you to engage the services of a competent architect. His experience will insure a home that will meet your requirements; his advice will guard you against mistakes and save you many future regrets.

There is one factor entering into home building that must be given more careful consideration today than ever before—that is—*modern* building materials. We emphasize the word *modern*. For the development in building materials has been revolutionary in the past few years, particularly in the manner in which they affect comfort, permanence and low upkeep.

Quietly, in the secrecy of the research laboratory, Carey scientists have been developing *new* building materials. Some of these modern Carey materials add new comforts—comforts and economies you

cannot afford to be without—for they return in fuel savings more than they cost. Other Carey materials pay their way in fire safety, lower-cost insurance, in elimination of painting, in lifetime service. *All* Carey Products reduce upkeep in the extra services they render.

Now is a good time to build a home. Labor is plentiful. Building materials may be had at attractive prices. Under the new N.H.A. legislation, financing may be arranged under the most favorable terms. Build your home now—make sure of permanent satisfaction and low upkeep by specifying Carey Dependable Products.

Tell your architect or builder you wish to use Carey Products. He will be glad to specify them, for the good reputation of Carey Products is the result of sixty-five years of continuous experience in the manufacture of dependable building materials.

It is the purpose of this book to show the advantages you can build into your home by using modern products. Carey Dealers and Branch Offices are eager to serve you with information, prices and materials.

Carey Expansion Joint—to prevent unsightly cracks in concrete work.

bathroom cabinets and accessories

MIAMI-CAREY Cabinets—combine modern design with utility and rugged construction—a complete line of accessories.

other people look at
roofs first
...and so shall we

NEXT time you walk or drive down the street, notice that you see the *roof* of a house before you are conscious of any other part.

A proper roof is like a hat that supplements and completes the attire of a well-dressed person. Because the roof is so conspicuous, it should be attractive and in complete harmony with the style and color of the home. Because of the service it must render, it should be of a quality about which there can be no question.

The roof has a responsibility next in importance to the foundation. It must protect everything under it, from the furnishings to the building itself. The roof, therefore, is NOT the place to practice "cost cutting" when you build.

Through years of research and experience, Carey has developed a line of roofs from which you may select the one that will best harmonize with the architecture of your home. Carey roofs are available in a wide range of prices to suit any building budget. But regardless of which Carey roof you choose, you are sure of maximum service for every dollar invested. Extra value is a fundamental of every Carey roof.

TO THE LEFT—reproduction of a direct color photograph of an attractive white brick Colonial home—roofed and protected for all time with Careystone Asbestos-Cement Shingles.

ROOFS THAT COVER YOUR INDIVIDUAL NEEDS

Careystone

ASBESTOS-CEMENT SHINGLES

Made of the imperishable materials, asbestos fibre and Portland cement, Careystone Shingles possess the peculiar property of increasing in toughness upon exposure to the elements. They are fire-proof, wear-proof and rot-proof—permanent as stone and, in appearance give an exact reproduction of wood grain—a beautiful roof that never requires painting or other upkeep.

Carey

CORK-INSULATED SHINGLES

Provide a durable, storm-proof roof plus insulation against heat and cold—at a cost very little above that of ordinary asphalt shingles. Where roof insulation is desired, this shingle affords considerable economy, since no additional labor or material is required in laying. The Cork-Insulated Shingle makes a finished roof of pleasing appearance, with deeper shadow lines due to the extra thickness.

Carey

ASFALTSLATE SHINGLES

Famous for their long wearing quality and natural beauty. They are proof against ordinary fire risks—low in upkeep, as they never require painting. Asfaltslate Shingles, both individual and strip, are manufactured over a base of tough rag felt, thoroughly saturated and coated with asphalt. To this is applied a layer of colored mineral granules, providing a durable wearing surface in natural colors—a roof of lasting beauty.

*why many builders will have
nothing else but*

Careystone

ASBESTOS-CEMENT SHINGLES

You wouldn't think of building a home without a permanent foundation. Can you afford to build without a permanent roof?

A permanent roof reduces your upkeep and repair expense; insures you against costly leaks; against fire hazards; lowers your insurance rates to the minimum; saves you the cost of ever having to rip off old shingles and pay for a new roof. Then, too, there's a feeling of security in living under a roof you know is fireproof—a roof on which sparks, embers, even burning brands fizzle out harmlessly.

All these advantages—these savings—are yours to enjoy when you roof your home with Careystone Asbestos-Cement Shingles. Once laid, your roof worries are over.

All Careystone Shingles, with the exception of the French method, have the appearance of wood shingles, the texture being an authentic reproduction of wood grain set in everlasting Portland cement and asbestos fibre. By a scientific process, these two lifetime materials are combined under great pressure, forming a shingle that will last as long as the building.

Careystone Shingles “pay their way” in permanent service and in elimination of painting and other upkeep expense.

CAREYSTONE WILL NOT BURN. The searing flame of the blow torch can find nothing in this shingle that will ignite. You owe yourself the protection from outside fires afforded by this modern roof.

*Budget and Architecture Meet
on a Common Ground with*

Carey

ASFALTSLATE SHINGLE

CONVENTIONAL in design, the Carey Asphaltslate Shingle is adaptable to many architectural treatments . . . assures a roof of long life and distinctive beauty at reasonable cost.

Made especially rugged and substantial to insure extra years of trouble-free service. A layer of colored mineral granules provides a beautiful and durable wearing surface. Full three thickness coverage assures maximum roof protection.

Asphaltslate Shingles are proof against all ordinary fire risks, such as flying sparks from chimneys and burning brands from neighborhood fires. You protect your home against fire, weather and time, when you roof with Carey Asphaltslate Shingles.

THE CERAMIC GRANULES used in the manufacture of Carey Shingles are made by applying a high-temperature, fusible, colored glaze to a mineral granule base and firing the glaze into the surface of the granule at a temperature of around 2000 degrees F. The mineral pigment colors and the firing conditions are very similar to those used in firing the decorative pattern on china or porcelain dishes. The color of the granule is just as permanent. It cannot fade or wash off.

Carey Cork-Insulated Shingles

GIVE TWO VALUES AT ONE COST

THIS is the only asphalt shingle with outside mineral surface for weather protection; cork underside for insulation. The cork layer acts as a barrier to heat and cold; makes the home several degrees cooler in summer and correspondingly warmer in winter.

This effective roof insulation is automatically applied when the roof is put on, eliminating the extra cost of material and labor involved when separate roof insulation is used.

Fuel Savings Pay the Bill—A study of actual roof conditions shows that for a roof of average area (15 squares), with an average difference between indoor and outdoor temperature of 40 degrees F., the home owner who burns fuel at \$9 per ton can save during a single heating season the difference in cost between an ordinary asphalt shingle roof and a Carey Cork-Insulated roof . . . and these savings continue year after year.

Carey Cork-Insulated Shingles are approved by Underwriters' Laboratories—assure a beautiful and distinctive roof; long, dependable service.

A GRAPHIC REPRESENTATION of the heat loss* through three layers of Carey Large Individual Shingles (5 inches exposure and spaced $\frac{3}{4}$ inches apart) compared with an identical application of Carey Cork-Insulated Large Individual Shingles, under the same test conditions, namely, a temperature difference of 70 degrees F. between the inner surface and outside air.

*B.T.U. heat loss per square foot, per hour.

YOUR CHOICE OF HARMONIOUS

DEPENDABLE, waterproof protection will always be the first essential of a good roof.

Yet the roof must satisfy another important requirement—appearance. Because the roof is the largest single area in the house and the dominant feature of its exterior, it should be in complete harmony both with the style of architecture and the color of the building.

Today, more than ever before, outside appearance is an important factor in home value. Home buyers want a roof that emphasizes the character of the home—that gives it dignity and charm. Here, color plays a vital part.

Carey Shingle colors have been developed through years of careful study and experience in

satisfying individual preferences of home owners and the rigid requirements of architects.

Carey Shingles are available in an adequate range of nature's own colors—warm reds, cool greens and beautiful blended tones, as reproduced on these pages. These colors harmonize with architecturally correct home exteriors and through combination of colors, an almost endless variety of effects may be secured, to meet the demands of any individual taste.

Carey Shingle colors are permanent. They cannot fade or wash off when exposed to the weather.

Carey will be glad to supply you with samples, so you may try them in various combinations and make sure your final selection will be right.

ANSWERS TO OTHER ROOFING PROBLEMS

Roll Roofing—To meet the demand for good low-priced quickly applied roofings, Carey offers a complete line of ready-to-lay Roll Roofings—in various weights and finishes—in a price range to meet every need . . . from the smallest temporary shed to the more permanent building. . . .

Roll Roofings in colorful mineral surfaced finishes for use on garages and other buildings where appearance is important. . . .

Other types of Roll Roofings in black finish for jobs where protection is the primary consideration.

Carey Roll Roofings are packaged in rolls containing sufficient material to cover 100 square feet of roof surface, allowing for laps. Nails and cement are packed inside each roll.

BUILDING PAPERS AND FELTS—Carey Waterproof Building Paper keeps out dampness, grit, wind—assures a cleaner, more comfortable home. Available in various types and weights to meet practically every need in modern home construction.

Built-Up Roofs—For flat roofs where shingles are not practical, Carey Built-Up Roofs are recommended. If your home plan calls for flat roof construction, be sure to specify these time-tried Carey Built-Up Roofs.

As the name implies, these roofs are built up, layer on layer, to meet the requirements of each job. Your architect or builder will be glad to determine the correct specifications for your building.

For more than fifty years, Carey Built-Up Roofs have been protecting many of America's largest commercial buildings . . . evidence these products will serve you well.

those who

Careystone
OLD COLONY DUO-EDGE
No. 210

This is another double edge unit, made with thatch butt on one edge and wave line on the other. When laid with one edge exposed, it presents the distinctive broken lines of thatch butt shingles laid in random widths. By exposing the other edge, a very pleasing wave line is secured. A unique treatment may be achieved by using both the wave line and thatch butt exposures on the same building.

Careystone
DUO "8" SIDING

This is a double edge unit, made with thatch butt on one edge and a straight line on the other. May be laid with either edge continually exposed, or alternated. Affords almost unlimited opportunity for planning distinctive exterior wall treatment. Ten or more separate and unusual patterns may be developed by combining this unit with the wider Old Colony Siding. In the manufacture of this siding, special care is given to the arrangement of the grain—to bring out the effect of random width, individual shingles.

re alert to Modern Developments in
Home Building Materials say...

BEFORE YOU BUILD... CONSIDER

Careystone

ASBESTOS-CEMENT SIDING

WHEN you specify Careystone Siding, you protect your building with a material that is fireproof and wear-proof—impervious to moisture—as permanent and unburnable as stone itself.

Can you imagine a more desirable material for protecting the outside walls of *your* home?

Available in a variety of shingle styles and in the time-honored Colonial Clapboards, Careystone Siding is perfectly adapted to many popular types of architecture. It may be had in styles and colors to meet every architectural requirement or personal taste.

Careystone Siding in Duck's Back White—See for yourself this newest development in pure white. It is whiter than white paint and stays white even during a soaking rain. Protects your building like a duck's back keeps its downy under coat dry and warm.

Careystone Siding “pays its way” in beauty, permanent service and freedom from upkeep.

Consider These
Advantages of

Careystone

ASBESTOS-CEMENT SIDING

1. Low first cost
2. Distinctive, beautiful appearance
3. No Upkeep Expense
4. No Painting required
5. Fireproof and wear-proof
6. Makes the home warmer in winter
7. Cooler in summer
8. Will not rot or deteriorate
9. Will not curl
10. Termite Proof

Careystone COLONIAL CLAPBOARD SIDING

Readily adaptable to almost every type of frame design. Its outstanding merit is substantiated by repeat orders for a new housing project which, when completed, will use approximately one-half million square feet.

A pleasing contrast is achieved when Colonial Clapboard Siding is used in conjunction with other types of Careystone Siding Units, in upper story or gable end treatment.

Careystone

ASBESTOS - CEMENT WALLBOARD

Made of asbestos fibres and Portland Cement. Ideal for use on walls, ceilings, panels and partitions. Can be nailed (without drilling) direct to wood studs. Furnished in an attractive buff color which makes a neat finish, or may be painted or papered. Makes an excellent fire stop when used on basement ceiling. Available in $\frac{3}{16}$ ", $\frac{1}{4}$ " and $\frac{3}{8}$ " thicknesses and in standard size sheets 48"x48" and 48"x96".

CAREYSTONE SCORED ASBESTOS - CEMENT WALLBOARD

Is the same base material described above, except that each sheet is scored in 4"x4" squares to provide a tile effect. Widely used for lower sections of walls in kitchens, bathrooms, breakfast rooms. Makes a beautiful tile appearance at a great saving in labor and material cost. Furnished in maximum size sheets 48"x96".

CAREYSTONE FLAT ASBESTOS SHEATHING

A board made of asbestos and cement—fireproof and weather-proof—suitable for interior and exterior use. Becoming increasingly popular for use in place of stucco in dormers and other places in home construction. Furnished in the white, natural color of the materials from which it is made. The color is permanent and will not discolor upon exposure to the elements. May be drilled and sawed with ordinary tools. Available in any size up to and including 48"x96", in thicknesses from $\frac{1}{8}$ " to 2", inclusive.

Typical installation of Careystone Scored Wallboard. Finished on the job by your painter.

DRY, HEALTHFUL, USEFUL BASEMENTS

CAREY DAMP-PROOFING AND WATERPROOFING

Basements not properly protected against the seepage of ground water become damp and unhealthy. To prevent this—to make sure your basement will be as dry and healthful as your living room, specify Carey Waterproofing Materials in your new home.

CAREY PERCOPROOF COATING

This compound, applied to the outside wall, penetrates the pores and seals out the ground water, assuring a dry basement. Percoproof comes in cans ready for use. Easily applied by unskilled labor. Must be applied to the outside of the wall only—preferably while the building is being erected.

CAREY PLASTIC WATERPROOFING COMPOUND

This is a fibrous black cement which is troweled onto the outside of the foundation walls, forming a tough and thick adhesive layer. Used where building is in low, heavy or soggy ground, where greater protection is needed than is afforded by the liquid Percoproof Coating. Applied to outside of basement wall only.

CAREY PERCOPROOF PLASTER BOND

When moisture soaks through from the outside of concrete, brick or hollow tile walls, it often causes ugly stains and cracks in the plaster, sometimes causes the plaster to fall. The use of Carey Percoproof Plaster Bond prevents the penetration of moisture. Applied directly to the wall, it penetrates the pores, sealing them against dampness. Percoproof Plaster Bond is of a thin, paint-like consistency and comes ready to apply with a brush, without the addition of solvents. It leaves the wall in its original roughness so that the plaster bonds firmly and permanently.

COLD

HOT

Carey INSULATIONS

UNCOVERED steam or hot water pipes act as radiators. They waste heat in basement, hollow walls and other places where heat is not needed.

USE CAREYCEL FOR YOUR HEATING SYSTEM

Careycel Asbestos Insulation is an exclusive, patented Carey Product, developed especially for hot water and steam heating systems. Impartial tests, made by a leading testing laboratory, demonstrated a 30% reduction in heat loss over the air cell type of covering ordinarily used. Put Careycel over all pipes leading from boiler to radiator; cover boiler with Careycel Asbestos Blocks. The savings in fuel will pay for the insulation and continue to pay you dividends in fuel saved year after year.

A CAREY TANK JACKET KEEPS HOT WATER HOT

Cover your hot water heater with a Carey Tank Jacket. The water will heat quicker and stay hot longer. The pipes leading from water heater to kitchen and bathroom allow the hot water to cool. Cover these pipes with Careycel Insulation and keep the water hot, right up to the faucets. This will save you money on water and gas bills; give you more hot water when you want it.

CAREY PERFECTO PIPE COVERING FOR COLD WATER LINES

Cold water lines usually run parallel to hot water lines through the walls to bathroom and kitchen. These pipes are warmed by the adjacent hot water pipes and it is usually necessary to run the cold water for some time to get it cool enough to use. Cover your cold water lines with Carey Perfecto Covering—have cool water right up to the faucets—reduce your water bills.

Note the neat finished appearance of this typical residential installation of Careyduct.

Illustrating simplified method of constructing fittings from standard Careyduct parts.

FOR THE HOME

ELIMINATE NOISY WASTE PIPES

You know how objectionable it is—and sometimes embarrassing—to hear waste water gurgling through the soil pipes between the partitions. This is easily overcome by insulating the soil pipes with Carey Perfecto Woolfelt Pipe Covering. Make Carey Pipe Covering a part of your heating and plumbing specifications. The work must be done before walls are closed and plastered.

ELIMINATE SWEATING PIPES

Like many home owners, you probably wish to make use of your basement as a recreation room, work shop, or laundry. Be sure to cover cold water lines with Carey Perfecto, the non-sweat insulation. It will eliminate dripping from pipes.

SPECIFY CAREYDUCT FOR YOUR AIR CONDITIONING SYSTEM

If air conditioning is included in your new home, be sure to specify Careyduct—the modern asbestos insulated duct. Careyduct is fireproof; permanent; will not rust or decay; hushes fan noises; insures uniform high efficiency in the whole duct system. Size for size, Careyduct is much cheaper than insulated metal. Easily erected; easily decorated.

CAREY EXPANSION JOINT PREVENTS UNSIGHTLY CRACKS

Variations in temperature cause concrete work to expand and contract. To prevent breakage and cracks due to this expansion and contraction, specify Carey Elastite Expansion Joint to be used in all concrete work about your home. Carey Expansion Joint is available in two types:

- A. Standard Asphalt Joint consisting of two layers of felt between which is interposed an asphaltic composition.
- B. A sponge rubber type of joint that is resilient. When compressed by the expansion of concrete, it will not extrude.

Unsightly cracks in concrete driveways are a thing of the past when Carey Elastite Expansion Joint is specified.

HOME INSULATION

Keeps Heat Inside in Winter

Keeps Heat Outside in Summer

Saves up to 30% on Fuel Bills

No Upkeep Cost

CAREY ROCKTEX is the modern Rock Wool Home Insulation. A 4-inch thick blanket of Rocktex installed in the walls and ceiling of your home is as efficient in stopping the flow of heat as a solid brick wall about five feet thick.

Fuel savings are definite because Rocktex stops the loss of heat that costs you so much to provide. Rocktex also effects important savings in reducing the size of the heating unit required to heat an uninsulated building. The saving in cost of the heating plant has, in many cases, paid for the insulation.

HOME INSULATION . . . A DE

Since Carey Rocktex reduces fuel consumption up to 30% or more, it is an important item in household economy. In many cases, it will go far toward paying the taxes on the property.

Carey Rocktex Insulation eliminates drafty rooms, cold corners and cold floors in winter. By maintaining even temperatures, it reduces rapidity of air change in the home, thereby diminishes evaporation of moisture in the air and helps to conserve the proper humidity so essential to health.

Carey Rocktex gives you increased fire protection. You don't have to push your furnace so hard in cold weather; thus you eliminate one of the greatest fire hazards. Rocktex eliminates lath marks and unsightly dark streaks on ceiling and walls. You don't have to redecorate so often, another important saving. Rocktex also increases property value. A Rocktex Insulated home is more livable—rents to better advantage . . . sells at a substantially better price.

Carey Rocktex is manufactured from mineral materials; therefore is permanent. It is fireproof . . . water repellant . . . odorless . . . highly efficient . . . light in weight . . . will not rot or decay . . . outlasts the building.

Carey Rocktex is available in forms for easy application in any type of building, old or new. Insulate with Carey Rocktex—it returns to you in savings *more than it costs.*

**REGARDLESS OF WEATHER CONDITIONS INSURE
YOURSELF OF COMFORT**

NO MORE COLD,
DRAFTY FLOORS.

**IF IT'S WINTER YOU WILL HAVE
FUEL SAVINGS UP TO 30%**

You will have no more of those "Hard to Heat" rooms. Your top floor rooms will be as comfortable as your lower floor rooms. Heat that ordinarily would be lost stays inside where it belongs. Floor and stairway drafts will be practically eliminated. Children can play on the floor without fear of usual colds.

MODERN NECESSITY FOR COMFORT AND ECONOMY

**IF IT'S SUMMER YOUR HOME WILL
BE UP TO 10 DEGREES COOLER**

Sleeping rooms which are unbearably hot will be comfortable. You will be assured a good night's sleep even in the hottest weather. Your top floor will be within two to three degrees of the lower floor. Returning home after a hot day in the office or shopping you will find your home refreshingly cool.

NO MORE BAKE-OVEN
BEDROOMS.

MIAMI *Glorifies* THE AMERICAN BATHROOM

OF ALL the fixtures and appointments that go into the Modern Bathroom, none play so important a role in providing beauty, distinctive charm, as well as utility, as the Cabinets and Accessories.

Bearing this in mind, Miami Engineers and Designers have spent their time and talents creating a line of Bathroom Cabinets that has become popularly and aptly known as "America's Finest."

Miami Cabinets are backed by more than seventeen years manufacturing experience. They are ruggedly constructed of finest quality, heavy materials and carefully finished to retain their beauty and brilliance indefinitely and to render lifetime service under hard use. Electric lighted cabinets are wired at the factory.

The Complete Line includes a wide variety of exclusive, distinctive models . . . ranging from luxurious cabinets and ensembles for the stately mansion to simple cabinets for the modest cottage. All are Miami quality throughout.

A few models are shown here. Should you desire more detailed information, or if you have a bathroom cabinet problem to be solved, write to us.

The IMPERIAL—Here is MIAMI'S latest development in Modern Bathroom Cabinets—an exclusive, distinctive Deluxe Model for those of discriminating taste. The frame around the entire cabinet is *brass, chromium plated*. Spacious side cabinets, one on each side of the large recessed mirror, have chromium framed mirror doors swung on *brass, chromium plated* piano-type hinges. Cabinets are finished inside in white *Crystal Snow* and are equipped with three glass shelves, stainless steel shelf supports and tooth brush holders. The shelf under the center mirror is white *vitrolite*.

The inside walls projecting outward from the center mirror are faced with mirrors that match the large center mirror. Two light bulbs concealed behind the opal flash-glass panel at top of the center mirror provide perfect reflected light for shaving or dressing the hair. Regular mirrors are "A" quality silver, *copper backed*, guaranteed for five years against silver spoilage. The new rose (or flesh) colored mirrors may be had if required.

The overall size is 32" x 32 $\frac{3}{8}$ "; the wall opening, 31 $\frac{1}{8}$ " x 31 $\frac{1}{2}$ " x 4 $\frac{3}{8}$ "; the center mirror measures 18" x 27 $\frac{1}{2}$ "; the two side mirrors, 5 $\frac{9}{16}$ " x 30 $\frac{1}{16}$ "

LOUIS XIV

MIRROR - CABINET

ENSEMBLE

NEW, DIFFERENT AND DISTINCTIVE

The *Louis XIV* unit is not merely a bathroom cabinet, but an ensemble of beautiful bathroom furniture. The center unit consists of a large recessed mirror flanked by narrow full length mirror panels that extend forward. There is no cabinet behind it. The frame around the entire center unit is *brass, chromium plated*. The mirrors are genuine "A" quality plate glass, *copper backed*, guaranteed for five years against silver spoilage. The center mirror may be either the regular "A" quality silver mirror or the new rose (flesh) color. The small side mirror panels on the center unit are optional as to color—either rose (flesh), blue, gun metal, green or regular silver.

MIAMI LOUIS XIV MIRROR-CABINET ENSEMBLE

The lights, concealed behind the white ground glass panel at the top of the center unit and behind the two narrow side mirrors, are arranged so as to reflect proper illumination to the center of the mirror. Light is also reflected out into the room through the top front panel.

The two side cabinets are finished inside in Miami white *Crystal Snow*, guaranteed not to retain a stain nor to discolor with age. Three glass shelves are furnished with each cabinet. The cabinet doors, hung on chromium plated brass piano type hinges, are fitted with mirrors set in brass, chromium plated frames that match the frame of the center unit. These mirrors are the new rose (flesh) color; regular silver is optional. The wall opening for the center unit is $28\frac{1}{2}'' \times 30\frac{3}{4}'' \times 4\frac{3}{8}''$; the overall size is $29\frac{1}{8}'' \times 31\frac{3}{8}''$; mirror, $20'' \times 26''$. For the side cabinets the wall opening is $24\frac{1}{2}'' \times 8\frac{1}{4}'' \times 4\frac{1}{4}''$; the overall size, $10\frac{1}{4}'' \times 28\frac{1}{4}''$; mirrors, $10'' \times 28''$.

MIAMI DUBARRY MIRROR-CABINET ENSEMBLE

Lifetime beauty today—always—colorful, brilliant, modern—The *DuBarry* brings all of this to the bathroom. The deep lustre of Chromium combined with colored mirrors or regular silver mirrors provides opportunities to create truly striking effects or to harmonize this complete unit with the general color scheme of the bathroom.

The center unit—a large recessed mirror flanked with narrow full length mirror panels—is set in a brass, chromium plated frame. The concealed light fixtures are located behind ground glass panels at the top center and behind the narrow mirrors on each side of the large center mirror. Perfect illumination for the entire bathroom and for shaving and dressing the hair is provided.

The color of the large center mirror is optional, either the new rose (flesh) or regular silver. The small narrow side mirrors may be had in blue, green, gun metal, rose (flesh) or regular silver.

There are no doors on the side cabinets. Cabinet frames are brass, chromium plated. These cabinets are lined on the inside with mirrors, either blue, green, gun metal, rose (flesh) or regular silver. Three glass shelves to match the mirrors are furnished with each cabinet.

The wall opening for the center unit is $28\frac{1}{2}'' \times 30\frac{3}{4}'' \times 4\frac{3}{8}''$; overall size, $29\frac{1}{8}'' \times 31\frac{3}{8}''$; mirror $20'' \times 26''$. For the side cabinets the wall opening is $25\frac{3}{8}'' \times 9\frac{3}{8}'' \times 4\frac{3}{8}''$; overall size, $9\frac{1}{8}'' \times 26''$.

DUBARRY

MIRROR - CABINET

ENSEMBLE

The POMPADOUR

The *Pompadour*, an ideal unit for guest bathroom, the downstairs lavatory or the dressing room, consists of a 26-inch circular mirror and glass-lined recessed shelf. There is no cabinet behind the circular mirror. The steel back on which the mirror is mounted is fitted for concealed hanging on the wall. The new rose (flesh) color mirror is available at slight additional cost.

The frame around the lower recessed shelf is brass, *chromium plated*. The shelf itself is lined with mirrors. Colors available are blue, green, gun metal, rose (flesh) or regular silver. The wall opening for the lower shelf is 23 $\frac{3}{8}$ "x7 $\frac{7}{8}$ "x4 $\frac{3}{8}$ ".

The DUCHESS—The MODERNE

These two popular cabinets are identical, except that the *Duchess* has the mirror set in a beautiful circular frame of *brass, chromium plated*, styled to match today's modern chromium plated bathroom fixtures and accessories.

When installed in the wall, the *Moderne* and the *Duchess* look like beautiful circular mirrors hung on the wall. The illustration of the *Pompadour* at the left shows how both models appear when the door is closed. The ingenious hinge on which the door is swung permits it to be pulled outward over the lavatory so that when opened the mirror is only a few inches from the face—an ideal arrangement for shaving or dressing the hair.

The cabinet box of both the *Duchess* and *Moderne* is constructed of heavy-gauge ARMCO steel. The body and door backs are finished in *Miami Crystal Snow*, guaranteed not to retain a stain or to discolor with age. Equipped with two adjustable plate glass shelves, and *Miami chromium plated* razor blade drop. Mirror size is 26" circle; wall opening, 16 $\frac{1}{2}$ "x16 $\frac{1}{2}$ "x4 $\frac{1}{4}$ ".

The POWDER PUFF

The custom-built *Powder Puff* unit, illustrated on the left, adds the final touch to the modern powder or dressing room. The outside frame is *brass* finished in lustrous *chromium plate*. The large center mirror is genuine "A" quality plate glass in either the new rose (flesh) color or regular silver, as desired.

The small mirrors on either side of the large center mirror are optional as to color—either rose (flesh), gun metal, blue, green or regular silver. The recessed lower shelf may also be had in the same colors as the small side mirrors or in regular silver.

The light brackets are concealed behind the two small side mirrors and are so located that the light is reflected onto the large center mirror through ground glass panels. The overall size is 35"x41 $\frac{1}{4}$ "; wall opening, 34 $\frac{3}{8}$ "x40 $\frac{5}{8}$ "x4 $\frac{3}{8}$ ".

FOR the MODERN POWDER ROOM

In the home of today, the Powder Room is almost as essential as was the bathroom in the house of the late nineties. Equipped with the beautiful *Miami "Powder Puff,"* it attains the utmost in completeness and distinctiveness.

TUBULAR LIGHT BRACKETS

for MIAMI CAREY CABINETS

MIAMI CABINET FITTED WITH LIGHT BRACKETS No. 3.

MIAMI CABINET WITH OVERHEAD LIGHT BRACKET No. 4.

TUBULAR LIGHT BRACKETS No. 3

The No. 3 Tubular Light Brackets are designed to take a T-8 frosted bulb, either 40 or 60-watt. This bulb is available at all electric shops. There is no glass shield over the bulb. The frosted light bulb itself serves the purpose. Both No. 3 and No. 4 Tubular Light Brackets have chromium plated shields around the light bulbs, adjustable in all arcs of a 180° angle.

SWITCH AND OUTLET

All cabinets ordered with light brackets attached are fitted with switch and electric convenience outlet. They are fitted on the return flanges of the cabinet.

OVERHEAD TUBULAR LIGHT BRACKET No. 4

The above photograph illustrates a square top cabinet fitted with a single Tubular Light Bracket. This type of installation is recommended for the small bathroom, for the downstairs lavatory and for the low cost home where perfect illumination of the bathroom is as essential as in the more costly home.

TOWEL SUPPLY and UTILITY CABINETS

MODEL 510-A

Designed for the luxurious bathroom. The "A" quality mirror, set in a beautiful *chromium plated* frame, is *copper backed*, guaranteed for five years against silver spoilage. The heavy, air cushioned door is swung on a *brass, chromium plated* piano hinge. The cabinet and door back are finished in *Miami Crystal Snow*, guaranteed not to retain a stain nor to discolor with age. Five glass shelves are furnished. Mirrored door also serves as a full-length bathroom mirror. The wall opening is 17 $\frac{3}{4}$ "x57 $\frac{3}{4}$ "x8"; mirror, 20"x60"; overall, 20 $\frac{1}{4}$ "x60 $\frac{1}{4}$ "x8 $\frac{5}{8}$ ".

MODEL 500

This cabinet, smaller than the No. 510-A, is designed and constructed for the less pretentious bathroom where extra storage space is also required. The entire cabinet, including the door, is constructed of ARMCO selected steel. Five glass shelves are furnished. The door is swung on three *brass, chromium plated* hinges. There is no mirror in the door. The cabinet is finished in Carey first quality baked enamel. White is the regular finish. At additional cost the unit may be had in any color desired. The wall opening required is 14 $\frac{3}{4}$ "x34 $\frac{1}{2}$ "x6"; the overall size is 18"x37 $\frac{3}{4}$ "x6 $\frac{3}{4}$ ".

MODEL 510-A

MODEL 500

Nos. 610-G, 620-G

This model has no frame around the mirror. The mirror is hung on a steel door of the hollow metal type and covers the entire cabinet so that when the cabinet is set in place, the appearance is that of a mirror hung on the face of the wall. The arched top suggests this cabinet for the bathroom where the design is arched or curved.

To those who prefer the all-glass front cabinet with no knob, hinges or ugly screw heads to mar the face of the mirror, we recommend this Gothic model.

SPECIFICATIONS

	No. 610-G	No. 620-G
Overall	16"x26"	18"x28"
Mirror	16"x26"	18"x28"
Wall Opening	13 $\frac{3}{4}$ "x19 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "	15 $\frac{3}{4}$ "x21 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "

THE ARISTOCRATS

The Aristocrat model illustrated below is designed for the home where price must be considered, but where quality is also taken into consideration. It was created by Carey engineers to embody both beauty of design and sturdiness of construction—at a moderate price. When the Aristocrat is set on the wall, it resembles an unusually handsome mirror. There is no knob, hardware or portion of the body visible.

No. 660-F, 670-F

SPECIFICATIONS

	No. 660-F
Mirror	16"x24"
Wall Opening	13 $\frac{3}{4}$ "x19 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "
	No. 670-F
Mirror	18"x30"
Wall Opening	15 $\frac{3}{4}$ "x21 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "

EQUIPMENT

Regular equipment includes three adjustable glass shelves, razor blade drop, piano hinge, tooth brush racks.

CABINETS

with

FULL-MIRROR DOOR

GOTHIC TOP MODELS

The classic beauty of these two Carey Cabinets with full mirror door is now available for the modest home and apartment at new all-time low prices. We are able to offer these two new and different Gothic models at such prices only because of improved manufacturing methods.

Nos. 2010-P, 2020-P

The Gothic Top Model shown above has a *stainless steel* frame around the mirror, absolutely non-rusting and may be kept clean and highly polished just by rubbing with a clean, dry cloth. *Stainless steel* is the perfect match for chromium plated bathroom fixtures; hence, this Gothic model is particularly recommended for bathrooms fitted with chromium plated fixtures where the budget does not permit the purchase of higher priced chromium plated models.

SPECIFICATIONS

	No. 2010-P	No. 2020-P
Overall	16 $\frac{5}{8}$ "x26 $\frac{5}{8}$ "	18 $\frac{5}{8}$ "x28 $\frac{5}{8}$ "
Mirror	16"x26"	18"x28"
Wall Opening	13 $\frac{3}{4}$ "x19 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "	15 $\frac{3}{4}$ "x21 $\frac{3}{4}$ "x3 $\frac{1}{2}$ "

MASTER MODELS

The Master models are suggested for the bathroom where straight lines are required. The one-piece *brass, chromium plated* frame eliminates the necessity of ugly corner clips commonly used to cover up open joints. The cabinet body and door back are finished in the famous *Miami Crystal Snow*, noted for durability.

SPECIFICATIONS

	No. 1100
Overall	16 $\frac{1}{4}$ "x22 $\frac{1}{4}$ "
Mirror	16"x22"
Wall Opening	13 $\frac{3}{4}$ "x19 $\frac{3}{4}$ "x4 $\frac{1}{4}$ "
	No. 1150
Overall	18 $\frac{1}{4}$ "x24 $\frac{1}{4}$ "

CHROMIUM BATHROOM ACCESSORIES

by MIAMI

BRILLIANTLY BEAUTIFUL

The line of MIAMI Chromium Lifetime Bathroom Accessories was developed to meet the need of those who wanted a product that was thoroughly modern . . . that could be bought at popular prices . . . that could be inexpensively installed in practically any bathroom.

MIAMI Chromium Bathroom Accessories are built to resist long wear and hard use. Over a forged, brass base, a thick coating of nickel is applied and then a covering of hard chromium. This method of manufacture assures a product that will give utmost satisfaction and retain its original brilliance.

Projection type accessories, a few of which are illustrated on the right, are tightly secured with a new type of key plug. They are furnished with either "L" lug type brackets for installing the fixture permanently into the wall; or with "S" screw-on type brackets that fasten to practically any surface. The screws are concealed by the front plate of the bracket.

The recessed accessories shown at the bottom of this page are provided with larger and wider flanges which eliminate open joints, fit perfectly and give a more finished appearance. When installed, they become a part of the wall itself.

MIAMI "Time Saver" Recessed Accessories are the same in appearance as the Miami Recessed Accessories. Although they are smaller, they are equal in inside area to the average 6" x 6" china accessory.
